

## c-Myc (Acetyl Lys148) rabbit pAb

| Catalog No         | BYab-00918   |
|--------------------|--|
| Isotype            | lgG  |
| Reactivity         | Human;Mouse;Rat  |
| Applications       | WB; ELISA  |
| Gene Name          | MYC BHLHE39  |
| Protein Name       | c-Myc (Acetyl Lys148)  |
| Immunogen          | Synthesized peptide derived from human c-Myc (Acetyl Lys148)   |
| Specificity        | This antibody detects endogenous levels of Human,Mouse,Rat c-Myb (Acetyl<br>Lys148)  |
| Formulation        | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  |
| Source             | Polyclonal, Rabbit,IgG   |
| Purification       | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.  |
| Dilution           | WB 1:1000-2000 ELISA 1:5000-20000  |
| Concentration      | 1 mg/ml  |
| Purity             | ≥90%   |
| Storage Stability  | -20°C/1 year   |
| Synonyms           | Myc proto-oncogene protein (Class E basic helix-loop-helix protein 39;bHLHe39;Proto-oncogene c-Myc;Transcription factor p64)   |
| Observed Band      | 55kD   |
| Cell Pathway       | Nucleus, nucleoplasm . Nucleus, nucleolus .  |
| Tissue Specificity |  |
| Function           | DNA catabolic process, endonucleolytic, skeletal system development, B cell<br>apoptosis, release of cytochrome c from mitochondria, regulation of B cell<br>apoptosis, positive regulation of B cell apoptosis, monosaccharide metabolic<br>process, glucose metabolic process, DNA metabolic process, DNA catabolic<br>process, DNA fragmentation involved in apoptosis, transcription, transcription,<br>DNA-dependent, transcription initiation, regulation of transcription,<br>DNA-dependent, regulation of transcription from RNA polymerase II<br>promoter, transcription from RNA polymerase II promoter, protein complex<br>assembly, cellular ion homeostasis, cellular iron ion<br>homeostasis, apoptosis, anti-apoptosis, induction of apoptosis, nucleus |
|                    | Naniing RVahesianca tashnalagu Ca. Itd   |

|----------------------------|--|
|                            | organization,mitochondrion organization, cell cycle, cell cycle arrest, regulation of mitotic cell cycle, sens   |
| Background                 | disease:A chromosomal aberration involving MYC may be a cause of a form of<br>B-cell chronic lymphocytic leukemia. Translocation t(8;12)(q24;q22) with<br>BTG1.,disease:Overexpression of MYC is implicated in the etiology of a variety of<br>hematopoietic tumors.,function:Participates in the regulation of gene transcription.<br>Binds DNA both in a non-specific manner and also specifically to recognizes the<br>core sequence 5'-CAC[GA]TG-3'. Seems to activate the transcription of<br>growth-related genes.,online information:Myc entry,PTM:Phosphorylated by<br>PRKDC.,similarity:Contains 1 basic helix-loop-helix (bHLH)<br>domain.,subunit:Efficient DNA binding requires dimerization with another bHLH<br>protein. Binds DNA as a heterodimer with MAX. Interacts with TAF1C and<br>SPAG9. Interacts with PARP10. Interacts with KDM5A and KDM5B., |
| matters needing attention  | Avoid repeated freezing and thawing!   |
| Usage suggestions          | This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.  |
