

CtIP Polyclonal Antibody

Catalog No BYab-01636 Isotype IgG Reactivity Human;Mouse Applications IHC;IF;ELISA Gene Name RBBP8 Protein Name DNA endonuclease RBBP8 Immunogen The antiserum was produced against synthesized peptide derived from human RBBP8. AA range:630-679 Specificity CtIP Polyclonal Antibody detects endogenous levels of CtIP protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution IHC: 1/100 - 1/300. ELISA: 1/5000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Storage Stability -20°C/1 year Synonyms RBBPS, CTIP; DNA endonuclease RBBP8; CtBP-interacting protein; CtIP; Retinoblastoma-binding protein 8; RBBP-8; Retinoblastoma-interacting protein and myosin-like; RIM; Sporulation in the absence of SPO11 protein 2 homolog; SAE2 Observed Band Cell Pathway Nucleus . Chromosome . Associates with sites of DNA damage in S/G2 phase (PubMed: 16818604).

CTBP, with the C-terminal (BRCT)	domains of BRCA1, and with the
retinoblastoma protein.,	

Background

The protein encoded by this gene is a ubiquitously expressed nuclear protein. It is found among several proteins that bind directly to retinoblastoma protein, which regulates cell proliferation. This protein complexes with transcriptional co-repressor CTBP. It is also associated with BRCA1 and is thought to modulate the functions of BRCA1 in transcriptional regulation, DNA repair, and/or cell cycle checkpoint control. It is suggested that this gene may itself be a tumor suppressor acting in the same pathway as BRCA1. Three transcript variants encoding two different isoforms have been found for this gene. More transcript variants exist, but their full-length natures have not been determined. [provided by RefSeq, Jul 2008],
