

cPLA2-δ Polyclonal Antibody

. Translocates to perinuclear membranes that may correspond to endoplasmic reticulum or Golgi in a calcium-dependent fashion. Tissue Specificity Expressed in stratified squamous epithelia, such as those in skin and cervix, but		
Reactivity Human;Rat;Mouse; Applications IHC;IF;ELISA Gene Name PLA2G4D Protein Name Cytosolic phospholipase A2 delta Immunogen The antiserum was produced against synthesized peptide derived from human PLA2G4D. AA range:531-580 Specificity cPLA2-δ Polyclonal Antibody detects endogenous levels of cPLA2-δ protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dillution IHC: 1/100 - 1/300. ELISA: 1/40000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms PLA2G4D; Cytosolic phospholipase A2 delta; cPLA2-delta; Phospholipase A2 group IVD Observed Band Cytoplasm, cytosol. Membrane; Peripheral membrane protein; Cytoplasmic side. Translocates to perinuclear membranes that may correspond to endoplasmic refuculum or Golgi in a calcium-dependent fashion. Tissue Specificity Expressed in stratified squamous epithelia, such as those in skin and cervix, but not in other itssues (PubMed:14709560). Strongly expressed in the upper spinous layer of the psoniatic epidermis, exp	Catalog No	BYab-02552

	acid-specific but has linoleic acid-specific activity. May play a role in inflammation in psoriatic lesions.,similarity:Contains 1 C2 domain.,similarity:Contains 1 PLA2c domain.,subcellular location:Translocates to membrane vesicles in a calcium-dependent fashion. Translocates to perinuclear regions upon ionomycin stimulation.,tissue specificity:Expressed in stratified squamous epithelia, such as those in skin and cervix, but not in ot
Background	The phospholipase A2 enzyme family, including PLA2G4D, catalyze the hydrolysis of glycerophospholipids at the sn-2 position and then liberate free fatty acids and lysophospholipids (Chiba et al., 2004 [PubMed 14709560]).[supplied by OMIM, Jun 2009],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
