

WDR79 Monoclonal Antibody

Catalog No BYab-03447 Isotype IgG Reactivity Human;Mouse;Rat Applications WB Gene Name WRAP53 Protein Name Telomerase Cajal body protein 1 Immunogen Purified recombinant human WDR79 protein fragments expressed in E.coli. Specificity WDR79 Monoclonal Antibody detects endogenous levels of WDR79 protein. Formulation Purified mouse monoclonal in buffer containing 0.1M Tris-Glycine (pH 7.4, 150 mM NaCl) with 0.2% sodium azide, 50% glycerol. Source Monoclonal, Mouse Purification Affinity purification Dilution Western Blot: 1/1000 - 1/2000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms WRAP53; TCAB1; WDR79; Telomerase Cajal body protein 1; WD repeat-containing protein 79; WD40 repeat-containing protein encoding RNA antisense to p53 Observed Band Cell Pathway Nucleus, Cajal body . Chromosome, telomere. Chromosome . Released from telomerase RNA template component (TERC) in mitotic cells coincident with delocalization from Cajal bodies (PubMed:28170453). In response to DNA damage, localizes to sites of DNA double-strand breaks following phosphorylation by ATM (PubMed:

Background	This gene encodes an essential component of the telomerase holoenzyme complex, a ribonucleoprotein complex required for telomere synthesis. This protein is enriched in Cajal bodies, nuclear sites of RNP processing that are important for telomerase function. It interacts with dyskerin, TERT and TERC, other components of active telomerase, and with small Cajal body RNAs (scaRNAs), which are involved in modifying splicing RNAs. This mRNA also functions as a p53 antisense transcript, that regulates endogenous p53 mRNA levels and further induction of p53 protein by targeting the 5' untranslated region of p53 mRNA. Alternatively spliced transcript variants which differ only in the 5' UTR have been found for this gene. [provided by RefSeq, Mar 2011],
