

Ribosomal Protein L27A Polyclonal Antibody

species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable		
Reactivity Human;Mouse;Rat Applications WB;IHC;IF;ELISA Gene Name RPL27A Protein Name 60S ribosomal protein L27a Immunogen The antiserum was produced against synthesized peptide derived from human RPL27A. AA range:99-148 Specificity Ribosomal Protein L27A Polyclonal Antibody detects endogenous levels of Ribosomal Protein L27A protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol, ribosome, large ribosomal subunit, membrane, cytosolic large ribosomal subunit, Tissue Specificity Brain, Colon, Kidney, Lymph, Function similarity: Belongs to the ribosomal protein L15P family. Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal variable	Catalog No	BYab-04136
Applications WB;IHC;IF;ELISA Gene Name RPL27A Protein Name 60S ribosomal protein L27a Immunogen The antiserum was produced against synthesized peptide derived from human RPL27A. AA range:99-148 Specificity Ribosomal Protein L27A Polyclonal Antibody detects endogenous levels of Ribosomal Protein L27A prolein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications. Concentration 1 mg/ml Purity 290% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol, ribosome, large ribosomal subunit, membrane, cytosolic large ribosomal subunit, Tissue Specificity Brain, Colon, Kidney, Lymph, Function similarity: Belongs to the ribosomal protein L15P family. Background Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family or fines gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The protein belongs to the L15P family or fines mall 40S subunit. The	Isotype	IgG
Gene Name RPL27A Protein Name 60S ribosomal protein L27a Immunogen The antiserum was produced against synthesized peptide derived from human RPL27A. AA range:99-148 Specificity Ribosomal Protein L27A Polyclonal Antibody detects endogenous levels of Ribosomal Protein L27A protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol, ribosome, large ribosomal subunit, membrane, cytosolic large ribosomal subunit, Tissue Specificity Brain, Colon, Kidney, Lymph, Function similarity: Belongs to the ribosomal protein L15P family. Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family or frobsomal proteins. It is located in the evoloplasm. Variable	Reactivity	Human;Mouse;Rat
Protein Name 60S ribosomal protein L27a Immunogen The antiserum was produced against synthesized peptide derived from human RPL27A. AA range:99-148 Specificity Ribosomal Protein L27A Polyclonal Antibody detects endogenous levels of Ribosomal Protein L27A protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300, Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Together these subunits are composed of 4 RNA species and approximately 80 subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Applications	WB;IHC;IF;ELISA
Immunogen The antiserum was produced against synthesized peptide derived from human RPL27A. applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol, ribosome, large ribosomal subunit, membrane, cytosolic large ribosomal subunit, Tissue Specificity Brain, Colon, Kidney, Lymph, Function similarity: Belongs to the ribosomal protein L15P family., Background Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Purification	
Purity ≥90% Storage Stability -20°C/1 year Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Tissue Specificity Brain,Colon,Kidney,Lymph, Function similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Dilution	Western Blot: 1/500 - 1/2000. Immunohistochemistry: 1/100 - 1/300. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/40000. Not yet tested in other applications.
Storage Stability -20°C/1 year RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Tissue Specificity Brain,Colon,Kidney,Lymph, Function Similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Concentration	1 mg/ml
Synonyms RPL27A; 60S ribosomal protein L27a Observed Band 20kD Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Tissue Specificity Brain,Colon,Kidney,Lymph, Function similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Purity	≥90%
Observed Band Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Tissue Specificity Brain,Colon,Kidney,Lymph, Function similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Storage Stability	-20°C/1 year
Cell Pathway cytosol,ribosome,large ribosomal subunit,membrane,cytosolic large ribosomal subunit, Tissue Specificity Brain,Colon,Kidney,Lymph, Function similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm, Variable	Synonyms	RPL27A; 60S ribosomal protein L27a
Tissue Specificity Brain,Colon,Kidney,Lymph, Function Similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Observed Band	20kD
Function Similarity:Belongs to the ribosomal protein L15P family., Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Cell Pathway	
Ribosomes, the organelles that catalyze protein synthesis, consist of a small 40S subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Tissue Specificity	Brain,Colon,Kidney,Lymph,
subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to the L15P family of ribosomal proteins. It is located in the cytoplasm. Variable	Function	similarity:Belongs to the ribosomal protein L15P family.,
	Background	subunit and a large 60S subunit. Together these subunits are composed of 4 RNA species and approximately 80 structurally distinct proteins. This gene encodes a ribosomal protein that is a component of the 60S subunit. The protein belongs to
