

K1H1 Polyclonal Antibody

Function miscellaneous:There are two types of hair/microfibrillar keratin, I (acidic) and II (neutral to basic).,similarity:Belongs to the intermediate filament family.,tissue specificity:Present in scalp but not in hairless skin. Abundantly expressed in the differentiating cortex of growing (anagen) hair. Expression is restricted to the		
Reactivity Human;Mouse Applications WB;ELISA Gene Name KRT31 HHA1 HKA1 KRTHA1 Protein Name Keratin, type I cuticular Ha1 (Hair keratin, type I Ha1) (Keratin-31) (K31) Immunogen Synthesized peptide derived from human protein . at AA range: 10-90 Specificity K1H1 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 45kD Cell Pathway extracellular space, intermediate filament, extracellular exosome, Tissue Specificity Present in scalp but not in hairless skin. Abundantly expressed in the differentiating cortex of growing (anagen) hair. Expression is restricted to the keratinocytes of the hair cortex and is absent from inner root sheath and medulla Function miscellaneous: There are two types of hair/microfibrillar keratin, 1 (acidic) and II (neutral to basic), similarity: Belongs to the intermediate filament family, issue specificity/Present in scalp but not in hairless skin. Abundantly expressed in the differentiating cortex of growing (anagen) hair. Expression is restricted to the keratinocytes of the hair cortex and is absent from inner root sheath and medulla Background The protein encoded by this gene is a member of the keratin gene family. As a type I hair keratin, it is an acidic protein which heterodimerizes with type I la keratin to form hair and nails. The type I hair keratins are clustered in a region of chromosome 17q12-q21 and have the same direction of transcription. [provided]	Catalog No	BYab-05118
Applications WB;ELISA Gene Name KRT31 HHA1 HKA1 KRTHA1 Protein Name Keratin, type I cuticular Ha1 (Hair keratin, type I Ha1) (Keratin-31) (K31) Immunogen Synthesized peptide derived from human protein . at AA range: 10-90 Specificity K1H1 Polyclonal Antibody detects endogenous levels of protein.
