

BTF3 Polyclonal Antibody

polymerase II. Required for the initiation of transcription.,PTM:Phosphorylated upon DNA damage, probably by ATM or ATR.,similarity:Belongs to the NAC-b family.,similarity:Contains 1 NAC-A/B (NAC-alpha/beta) domain., This gene encodes the basic transcription factor 3. This protein forms a stable complex with RNA polymerase IIB and is required for transcriptional initiation. Alternative splicing results in multiple transcript variants encoding different isoforms. This gene has multiple pseudogenes. [provided by RefSeq, Jul 2008] Matters needing Avoid repeated freezing and thawing!		
Reactivity Human;Mouse Applications WB;ELISA Gene Name BTF3 NACB OK/SW-cl.8 Protein Name Transcription factor BTF3 (RNA polymerase B transcription factor 3) Immunogen Synthesized peptide derived from human protein . at AA range: 120-200 Specificity BTF3 Polyclonal Antibody detects endogenous levels of protein. Formulation Liquid in PBS containing 50% glycerol, and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 ELISA 1:5000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Observed Band 22kD Cell Pathway Cytoplasm . Nucleus . The heterodimer with NACA is cytoplasmic. Tissue Specificity Colon adenocarcinoma, Leukocyte, Skin, function: General transcription factor. BTF3 can form a stable complex with RN polymerase II. Required for the initiation of transcription. PTM:Phosphorylated upon DNA damage, probably by ATM or ATR., similarity; Belongs to the NAC-b familly, similarity; Colonians 1 NAC-AMB (NAC-AMB	Catalog No	BYab-06298
