olfactory receptor family 1 subfamily J member 2(OR1J2) Holfactory receptors interact with odorant molecules in the neuronal response that triggers the perception of a smell. I proteins are members of a large family of G-protein-couple arising from single coding-exon genes. Olfactory receptors 7-transmembrane domain structure with many neurotransmereceptors and are responsible for the recognition and G pro	ose, to initiate a The olfactory receptor d receptors (GPCR) share a nitter and hormone
