

ASIC5 rabbit pAb

| Catalog No | BYab-08247 |
|--------------------|--|
| Isotype | IgG |
| Reactivity | Human; Mouse;Rat |
| Applications | WB |
| Gene Name | ASIC5 ACCN5 HINAC |
| Protein Name | ASIC5 |
| Immunogen | Synthesized peptide derived from human ASIC5 AA range: 412-462 |
| Specificity | This antibody detects endogenous levels of ASIC5 at Human/Mouse/Rat |
| Formulation | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. |
| Source | Polyclonal, Rabbit,IgG |
| Purification | The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen. |
| Dilution | WB 1: 500-2000 |
| Concentration | 1 mg/ml |
| Purity | ≥90% |
| Storage Stability | -20°C/1 year |
| Synonyms | |
| Observed Band | |
| Cell Pathway | Cell membrane ; Multi-pass membrane protein . |
| Tissue Specificity | Detected in small intestine, duodenum and jejunum. Detected at very low levels it testis and rectum. |
| Function | function:Cation channel that gives rise to very low constitutive currents in the absence of activation. The activated channel exhibits selectivity for sodium, and i inhibited by amiloride.,similarity:Belongs to the amiloride-sensitive sodium channel family.,subunit:Homotetramer or heterotetramer.,tissue specificity:Detected in small intestine, duodenum and jejunum. Detected at very low levels in testis and rectum., |
| Background | This gene belongs to the amiloride-sensitive Na+ channel and degenerin (NaC/DEG) family, members of which have been identified in many animal species ranging from the nematode to human. The amiloride-sensitive Na(+) channel encoded by this gene is primarily expressed in the small intestine, |
| | however, its exact function is not known. [provided by RefSeq, Jul 2008], |

matters needing attention

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
