Cell Pathway Cell membrane ; Multi-pass membrane protein . Early endosome . Recruited to the cell membrane in response to low extracellular magnesium
Tissue Specificity Widely expressed.
Function similarity:Belongs to the NIPA family.,tissue specificity:Widely expressed.,
Background This gene encodes a possible magnesium transporter. This gene is located adjacent to the imprinted domain in the Prader-Willi syndrome deletion region chromosome 15. Alternate splicing results in multiple transcript variants. Pseudogenes of this gene are found on chromosomes 3, 7 and 21.[provided b RefSeq, May 2010],
