

## GCM2 Polyclonal Antibody

Catalog No         BYab-10774           Isotype         IgG           Reactivity         Human;Mouse;Rat           Applications         WB;ELISA           Gene Name         GCM2           Protein Name         GCM2           Immunogen         Synthesized peptide derived from human GCM2, at AA range: 21-70           Specificity         GCM2 Polyclonal Antibody detects endogenous levels of GCM2           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Polyclonal, Rabbit, IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         WB 1:500-2000, ELISA 1:10000-20000           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         Chorion-specific transcription factor GCMb (hGCMb) (GCM motif protein 2) (Glia cells missing homolog 2)           Observed Band         56kD           Cell Pathway         Nucleus .           Tissue Specificity         Brain, Fetal brain,           Function         function:Probable transcriptional regulator.,similarity:Contains 1 GCM DNA-binding activity. The protein is a transcription factor might mediate the effect of calcium on parathyro		
Reactivity Human;Mouse;Rat  Applications WB;ELISA  Gene Name GCM2  Protein Name GCM2  Immunogen Synthesized peptide derived from human GCM2. at AA range: 21-70  Specificity GCM2 Polyclonal Antibody detects endogenous levels of GCM2  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit,IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000, ELISA 1:10000-20000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms Chorion-specific transcription factor GCMb (hGCMb) (GCM motif protein 2) (Glia cells missing homolog 2)  Observed Band 56kD  Cell Pathway Nucleus .  Tissue Specificity Brain, Fetal brain,  Function function: Probable transcriptional regulator., similarity: Contains 1 GCM DNA-binding domain.,  This gene is a homolog of the Drosophila glial cell determination. The protein encoded by this gene contains a conserved N-terminal GCM motif that has DNA-binding activity. The protein is a transcription factor that acts as a master regulator of parathyroid development. It has been suggested that this transcription factor might mediate the effect of calcium on parathyroid hormone expression and secretoin in parathyroid cells. Mutations in this gene are	Catalog No	BYab-10774
Applications WB;ELISA  Gene Name GCM2  Protein Name GCM2  Immunogen Synthesized peptide derived from human GCM2. at AA range: 21-70  Specificity GCM2 Polyclonal Antibody detects endogenous levels of GCM2  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit, IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB 1:500-2000, ELISA 1:10000-20000  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms Chorion-specific transcription factor GCMb (hGCMb) (GCM motif protein 2) (Glia cells missing homolog 2)  Observed Band 56kD  Cell Pathway Nucleus.  Tissue Specificity Brain, Fetal brain,  function: Probable transcriptional regulator., similarity: Contains 1 GCM  DNA-binding domain.,  Background This gene is a homolog of the Drosophila glial cell determination. The protein encoded by this gene contains a conserved N-terminal GCM motif that has DNA-binding activity. The protein is a transcription factor that acts as a master regulator of parathyroid development. It has been suggested that this transcription factor might mediate the effect of calcium on parathyroid hormone expression and secretorin in parathyroid cells. Mutations in this gene are	Isotype	IgG
Gene Name GCM2 Immunogen Synthesized peptide derived from human GCM2. at AA range: 21-70 Specificity GCM2 Polyclonal Antibody detects endogenous levels of GCM2 Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000, ELISA 1:10000-20000 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms Chorion-specific transcription factor GCMb (hGCMb) (GCM motif protein 2) (Gliacells missing homolog 2) Observed Band 56kD Cell Pathway Nucleus. Tissue Specificity Brain, Fetal brain, function: Probable transcriptional regulator., similarity: Contains 1 GCM DNA-binding domain., This gene is a homolog of the Drosophila glial cells missing gene, which is thought to act as a binary switch between neuronal and glial celtermination. The protein encoded by this gene contains a conserved N-terminal GCM motif that has DNA-binding activity. The protein is a transcription factor that acts as a master regulator of parathyroid development. It has been suggested that this transcription actor might mediate the effect of calcium on parathyroid hormone expression and secretion in parathyroid cells.
