

DTNA rabbit pAb

BYab-10992
IgG
Human; Mouse
WB
DTNA DRP3
DTNA
Synthesized peptide derived from human DTNA AA range: 131-181
This antibody detects endogenous levels of DTNA at Human/Mouse
Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Polyclonal, Rabbit,IgG
The antibody was affinity-purified from rabbit serum by affinity-chromatography using specific immunogen.
WB 1: 500-2000
1 mg/ml
≥90%
-20°C/1 year
Cytoplasm. Cell junction, synapse. Cell membrane . In peripheral nerves, colocalizes with MAGEE1 in the Schwann cell membrane
Cytoplasm. Cell junction, synapse. Cell membrane. In peripheral nerves, colocalizes with MAGEE1 in the Schwann cell membrane. Highly expressed in brain, skeletal and cardiac muscles, and expressed at lower levels in lung, liver and pancreas. Isoform 2 is not expressed in cardiac muscle. Isoform 7 and isoform 8 are only expressed in muscle.

	associated left ventricular dilation. In some cases, the right ventricle is also affected.,domain:The coiled coil domain mediates the inter
Background	The protein encoded by this gene belongs to the dystrobrevin subfamily of the dystrophin family. This protein is a component of the dystrophin-associated protein complex (DPC), which consists of dystrophin and several integral and peripheral membrane proteins, including dystroglycans, sarcoglycans, syntrophins and alpha- and beta-dystrobrevin. The DPC localizes to the sarcolemma and its disruption is associated with various forms of muscular dystrophy. Mutations in this gene are associated with left ventricular noncompaction with congenital heart defects. Multiple alternatively spliced transcript variants encoding different isoforms have been identified for this gene. [provided by RefSeq, Jul 2008],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
