

## Olfactory receptor 52N1 Polyclonal Antibody

| Catalog No         | BYab-13573  |
|--------------------|---|
| lsotype            | lgG   |
| Reactivity         | Human;Rat;Mouse;  |
| Applications       | WB;IF;ELISA   |
| Gene Name          | OR52N1  |
| Protein Name       | Olfactory receptor 52N1   |
| Immunogen          | The antiserum was produced against synthesized peptide derived from human OR52N1. AA range:269-318  |
| Specificity        | Olfactory receptor 52N1 Polyclonal Antibody detects endogenous levels of<br>Olfactory receptor 52N1 protein.  |
| Formulation        | Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.   |
| Source             | Polyclonal, Rabbit,IgG  |
| Purification       | The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.   |
| Dilution           | Western Blot: 1/500 - 1/2000. Immunofluorescence: 1/200 - 1/1000. ELISA: 1/20000. Not yet tested in other applications.   |
| Concentration      | 1 mg/ml   |
| Purity             | ≥90%  |
| Storage Stability  | -20°C/1 year  |
| Synonyms           | OR52N1; Olfactory receptor 52N1; Olfactory receptor OR11-61   |
| Observed Band      | 36kD  |
| Cell Pathway       | Cell membrane; Multi-pass membrane protein.   |
| Tissue Specificity |   |
| Function           | function:Odorant receptor .,similarity:Belongs to the G-protein coupled receptor 1 family.,   |
| Background         | Olfactory receptors interact with odorant molecules in the nose, to initiate a neuronal response that triggers the perception of a smell. The olfactory receptor proteins are members of a large family of G-protein-coupled receptors (GPCR) arising from single coding-exon genes. Olfactory receptors share a 7-transmembrane domain structure with many neurotransmitter and hormone receptors and are responsible for the recognition and G protein-mediated transduction of odorant signals. The olfactory receptor gene family is the largest in the genome. The nomenclature assigned to the olfactory receptor genes and |
