

Cleaved-CD97α (L530) Polyclonal Antibody

Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CD97; CD97 antigen; Leukocyte antigen CD97; CD antigen CD97 Observed Band 55kD Cell Pathway Cell membrane; Multi-pass membrane protein.; [Adhesion G protein-coupled receptor E5 subunit alpha]: Secreted, extracellular space. Tissue Specificity Broadly expressed, found on most hematopoietic cells, including activated lymphocytes, monocytes, macrophages, dendritic cells, and granulocytes. Expressed also abundantly by smooth muscle cells. Expressed in thyroid, colorectal, gastric, esophageal and pancreatic carcinomas too. Expression are increased under inflammatory conditions in the CNS of multiple sclerosis and in		
Reactivity Human;Rat;Mouse; Applications WB;ELISA Gene Name CD97 Protein Name CD97 antigen Immunogen The antiserum was produced against synthesized peptide derived from human CD97alpha. AA range:481-530 Specificity Cleaved-CD97α (L530) Polyclonal Antibody detects endogenous levels of fragment of activated CD97α protein resulting from cleavage adjacent to L530. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution Western Blot: 1/500 - 1/2000. ELISA: 1/5000. Not yet tested in other applications. Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms CD97; CD97 antigen; Leukocyte antigen CD97; CD antigen CD97 Observed Band 55kD Cell Pathway Cell membrane; Multi-pass membrane protein .; [Adhesion G protein-coupled receptor E5 subunit alpha]: Secreted, extracellular space. Tissue Specificity Broadly expressed, found on most hematopoietic cells, including activated lymphocytes, macrophages, dendrific cells, and granulocytes, Exp	Catalog No	BYab-13776
Applications WB;ELISA Gene Name CD97 Protein Name CD97 antigen Immunogen The antiserum was produced against synthesized peptide derived from human CD97alpha. AA range:481-530 Specificity Cleaved-CD97α (L530) Polyclonal Antibody detects endogenous levels of fragment of activated CD97d protein resulting from cleavage adjacent to L530. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. 	signaling processes early after leukocyte activation. Plays an essential role in leukocyte migration.,induction:Rapid up-regulation during lymphocyte activation.,PTM:Proteolytically cleaved into 2 subunits, an extracellular alpha subunit and a seven-transmembrane subunit.,similarity:Belongs to the G-protein coupled receptor 2 family. LN-TM7 subfamily.,similarity:Contains 1 GPS domain.,similarity:Contains 5 EGF-like domains.,subunit:Forms a heterodimer, consisting of a large extracellular region (alpha subunit) non-covalently linked to a seven-transmembrane moiety (beta subunit). Interacts
Background	This gene encodes a member of the EGF-TM7 subfamily of adhesion G protein-coupled receptors, which mediate cell-cell interactions. These proteins are cleaved by self-catalytic proteolysis into a large extracellular subunit and seven-span transmembrane subunit, which associate at the cell surface as a receptor complex. The encoded protein may play a role in cell adhesion as well as leukocyte recruitment, activation and migration, and contains multiple extracellular EGF-like repeats which mediate binding to chondroitin sulfate and the cell surface complement regulatory protein CD55. Expression of this gene may play a role in the progression of several types of cancer. Alternatively spliced transcript variants encoding multiple isoforms with 3 to 5 EGF-like repeats have been observed for this gene. This gene is found in a cluster with other EGF-TM7 genes on the short arm of chromosome 1
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
