

TIRAP Polyclonal Antibody

membrane. Tissue Specificity Highly expressed in liver, kidney, spleen, skeletal muscle and heart. Also detected		
Reactivity Human;Mouse Applications IHC;IF;WB;ELISA Gene Name TIRAP Protein Name Toll/interleukin-1 receptor domain-containing adapter protein Immunogen The antiserum was produced against synthesized peptide derived from human TIRAP. AA range:52-101 Specificity TIRAP Polyclonal Antibody detects endogenous levels of TIRAP protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit, IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 IHC: 1/100 - 1/300. ELISA: 1/20000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms TIRAP; MAL; Toll/interleukin-1 receptor domain-containing adapter protein; TIR domain-containing adapter protein; Adaptor protein Wyatt; MyD88 adapter-like protein Observed Band Cytoplasm. Cell membrane. Membrane. Colocalizes with DAB2IP at the plasma membrane. Tissue Specificity Highly expressed in liver, kidney, spleen, skeletal muscle and heart. Also detected in peripheral blood leukocytes, lung, placentra, small intestine, thymus, colon abrain. <	Catalog No	BYab-13967
Applications IHC;IF;WB;ELISA Gene Name TIRAP Protein Name Toll/interleukin-1 receptor domain-containing adapter protein Immunogen The antiserum was produced against synthesized peptide derived from human TIRAP. AA range:52-101 Specificity TIRAP Polyclonal Antibody detects endogenous levels of TIRAP protein. Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide. Source Polyclonal, Rabbit,IgG Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen. Dilution WB 1:500-2000 IHC: 1/100 - 1/300. ELISA: 1/20000 IF 1:50-200 Concentration 1 mg/ml Purity ≥90% Storage Stability -20°C/1 year Synonyms TIRAP; MAL; Toll/interleukin-1 receptor domain-containing adapter protein; TIR domain-containing adapter protein, Adaptor protein Wyatt; MyD88 adapter-like protein Observed Band Cell Pathway Cytoplasm . Cell membrane . Membrane . Colocalizes with DAB2IP at the plasma membrane. Tissue Specificity Highly expressed in liver, kidney, spleen, skeletal muscle and heart. Also detected in peripheral blood leukocytes, lung, placenta, small intestine, thymus, colon abrain. Function function: Adapter involved in the TLR4 signaling pathway in the innate immune response. Acts via IRAK2 and TRAF-6, leading to the activation of NF-kappa-B, MAPK1, MAPK3 and JNK, resulting in cytokine secretion and the inflammatory response, polymorphism: Genetic variation in TIRAP can inflame and tuberculosi, similarity. Contains 1 TIR domain, sububurit-thomotical and tuberculosis, similarity. Contains 1 TIRAP can inflame Also forms	Isotype	IgG
Protein Name TIRAP Toll/interleukin-1 receptor domain-containing adapter protein	Reactivity	Human;Mouse

Also detected in peripheral blood leukocytes, lung, placenta, small intestine, thymus, colon and brain
trymas, color and brain.,

Background

The innate immune system recognizes microbial pathogens through Toll-like receptors (TLRs), which identify pathogen-associated molecular patterns. Different TLRs recognize different pathogen-associated molecular patterns and all TLRs have a Toll-interleukin 1 receptor (TIR) domain, which is responsible for signal transduction. The protein encoded by this gene is a TIR adaptor protein involved in the TLR4 signaling pathway of the immune system. It activates NF-kappa-B, MAPK1, MAPK3 and JNK, which then results in cytokine secretion and the inflammatory response. Alternative splicing of this gene results in several transcript variants; however, not all variants have been fully described. [provided by RefSeq, Jul 2008],

Avoid repeated freezing and thawing!

Usage suggestions

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.

Products Images

Immunohistochemical analysis of paraffin-embedded Human brain. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtaned from antibody was pre-absorbed by immunogen peptide.
