

## CD235a Polyclonal Antibody

Catalog No         BYab-14082           Isotype         IgG           Reactivity         Human;Rat;Mouse;           Applications         WB;IHC;IF;ELISA           Gene Name         GYPA           Protein Name         Glycophorin-A           Immunogen         The antiserum was produced against synthesized peptide derived from the Internal region of human GYPA. AA range:41-90           Specificity         CD235a Polyclonal Antibody detects endogenous levels of CD235a protein.           Formulation         Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.           Source         Polyclonal, Rabbit,IgG           Purification         The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.           Dilution         WB: 1/500 - 1/2000. IHC-p: 1:100-1:300. ELISA: 1/10000 IF 1:50-200           Concentration         1 mg/ml           Purity         ≥90%           Storage Stability         -20°C/1 year           Synonyms         GYPA; GPA; Glycophorin-A; MN sialoglycoprotein; PAS-2; Sialoglycoprotein alpha; CD235a           Observed Band         16kD           Cell Pathway         Cell membrane; Single-pass type I membrane protein . Appears to be colocalized with SLC4A1.           Tissue Specificity         Blood,Bone marrow, Kidney, Liver, Lung, Miltenberger class V,		
Reactivity Human;Rat;Mouse;  Applications WB;IHC;IF;ELISA  Gene Name GYPA  Protein Name Glycophorin-A  Immunogen The antiserum was produced against synthesized peptide derived from the Internal region of human GYPA. AA range:41-90  Specificity CD235a Polyclonal Antibody detects endogenous levels of CD235a protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit;IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB: 1/500 - 1/2000. IHC-p: 1:100-1:300. ELISA: 1/10000 IF 1:50-200  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms GYPA; GPA; Glycophorin-A; MN sialoglycoprotein; PAS-2; Sialoglycoprotein alpha; CD235a  Observed Band 16kD  Cell Pathway Cell membrane; Single-pass type I membrane protein . Appears to be colocalized with SLC4A1.  Tissue Specificity Blood, Bone marrow, Kidney, Liver, Lung, Miltenberger class V,  Function function; Glycophorin A is the major intrinsic membrane protein of the enythrocyte. The N-terminal glycosylated segment, which lies outside the enythrocyte membrane; has MN blood group receptors and also binds influenza virus, online information: Blood group antigen gene mutation database, polymorphism:Along with GYPB, GYPA) and B (GYPB) are major sialoglycoproteins of the human envithocyte membrane which bear the antigenic determinants for the MN	Catalog No	BYab-14082
Applications WB;IHC;IF;ELISA  Gene Name GYPA  Protein Name Glycophorin-A  Immunogen The antiserum was produced against synthesized peptide derived from the Internal region of human GYPA. AA range:41-90  Specificity CD235a Polyclonal Antibody detects endogenous levels of CD235a protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit,IgG  Purification The antibody was affinity-purifiled from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB: 1/500 - 1/2000. IHC-p: 1:100-1:300. ELISA: 1/10000 IF 1:50-200  Concentration 1 mg/ml  Purity ≥90%  Storage Stability -20°C/1 year  Synonyms GYPA; GPA; Glycophorin-A; MN sialoglycoprotein; PAS-2; Sialoglycoprotein alpha; CD235a  Observed Band 16kD  Cell Pathway Cell membrane; Single-pass type I membrane protein . Appears to be colocalized with SLC4A1.  Tissue Specificity Blood,Bone marrow,Kidney,Liver,Lung,Miltenberger class V,  Function function:Glycophorin A is the major intrinsic membrane protein of the erythrocyte. The N-terminal glycosylated segment, which lies outside the erythrocyte membrane has MN blood group receptors and also binds the fulluman erythrocyte membrane. Pas GyPA is responsible for the MNS blood group system.,similarity:Belongs to the glycophorin A familly.  Background Glycophorins A (GYPA) and B (GYPB) are major sialoglycoproteins of the human erythrocyte membrane merythnovete membrane melythobear the antigenic determinants for the MN	Isotype	IgG
Gene Name GYPA  Protein Name Glycophorin-A  Immunogen The antiserum was produced against synthesized peptide derived from the Internal region of human GYPA. AA range:41-90  Specificity CD235a Polyclonal Antibody detects endogenous levels of CD235a protein.  Formulation Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.  Source Polyclonal, Rabbit,IgG  Purification The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.  Dilution WB: 1/500 - 1/2000. IHC-p: 1:100-1:300. ELISA: 1/10000 IF 1:50-200  Concentration 1 mg/ml  Purity 290%  Storage Stability -20°C/1 year  Synonyms GYPA; GPA; Glycophorin-A; MN sialoglycoprotein; PAS-2; Sialoglycoprotein alpha; CD235a  Observed Band 16kD  Cell Pathway Cell membrane; Single-pass type I membrane protein . Appears to be colocalized with SLC4A1.  Tissue Specificity Blood,Bone marrow,Kidney,Liver,Lung,Miltenberger class V,  Function function:Glycophorin A is the major intrinsic membrane protein of the erythrocyte membrane, has MN blood group receptors and also binds the erythrocyte membrane has MN blood group receptors and also binds influenza virus, online information:Blood group antigen gene mutation database, polymorphism:Along with GYPB, GYPA is responsible for the MNS blood group system.,similarity:Belongs to the glycophorin A familly.  Background GYPA) and B (GYPB) are major sialoglycoproteins of the human erythrocyte membrane membrane which bear the antigenic determinants for the MN	Reactivity	Human;Rat;Mouse;

	occur in all populations, about 40 related variant phenotypes have been identified. These variants include all the variants of the Miltenberger complex and several isoforms of Sta, as well as Dantu, Sat, He, Mg, and deletion variants Ena, S-s-U-and Mk. Most of the variants are the result of gene recombinations between GYPA and GYPB. [provided by RefSeq, Jul 2008],
matters needing attention	Avoid repeated freezing and thawing!
Usage suggestions	This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.
