

# Caspase-2 (phospho Ser157) Polyclonal Antibody

BYab-00230
IgG
Human;Rat;Mouse;
IHC;IF;ELISA
CASP2
Caspase2
The antiserum was produced against synthesized peptide derived from human Caspase 2 around the phosphorylation site of Ser157. AA range:123-172
Phospho-Caspase-2 (S157) Polyclonal Antibody detects endogenous levels of Caspase-2 protein only when phosphorylated at S157.
Liquid in PBS containing 50% glycerol, 0.5% BSA and 0.02% sodium azide.
Polyclonal, Rabbit,IgG
The antibody was affinity-purified from rabbit antiserum by affinity-chromatography using epitope-specific immunogen.
IHC: 1/100 - 1/300. ELISA: 1/10000 IF 1:50-200
1 mg/ml
≥90%
-20°C/1 year
CASP2; ICH1; NEDD2; Caspase-2; CASP-2; Neural precursor cell expressed developmentally down-regulated protein 2; NEDD-2; Protease ICH-1
nucleus,cytoplasm,mitochondrion,cytosol,membrane,
Expressed at higher levels in the embryonic lung, liver and kidney than in the heart and brain. In adults, higher level expression is seen in the placenta, lung, kidney, and pancreas than in the heart, brain, liver and skeletal muscle.
alternative products:Isoforms differ in the N- and C-termini,catalytic activity:Strict requirement for an Asp residue at P1, with 316-asp being essential for proteolytic activity and has a preferred cleavage sequence of Val-Asp-Val-Ala-Asp- ,function:Involved in the activation cascade of caspases responsible for apoptosis execution. Might function by either activating some proteins required for cell death or inactivating proteins necessary for cell survival.,PTM:The mature protease can process its own propeptide, but not that of other caspases.,similarity:Belongs to the peptidase C14A family.,similarity:Contains 1 CARD domain.,subunit:Heterotetramer that consists

of two anti-parallel arranged heterodimers, each one formed by a p18 subunit and
a p12 subunit. Interacts with LRDD, tissue specificity: Expressed at higher levels in
the embryonic lung, liver and kidney than in the heart and b

#### **Background**

This gene encodes a member of the cysteine-aspartic acid protease (caspase) family. Caspases mediate cellular apoptosis through the proteolytic cleavage of specific protein substrates. The encoded protein may function in stress-induced cell death pathways, cell cycle maintenance, and the suppression of tumorigenesis. Increased expression of this gene may play a role in neurodegenerative disorders including Alzheimer's disease, Huntington's disease and temporal lobe epilepsy. Alternatively spliced transcript variants encoding multiple isoforms have been observed for this gene. [provided by RefSeq, Jan 2011],

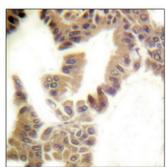

## matters needing attention

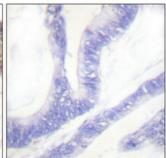

Avoid repeated freezing and thawing!

### **Usage suggestions**

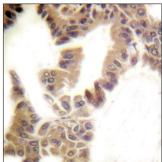

This product can be used in immunological reaction related experiments. For more information, please consult technical personnel.

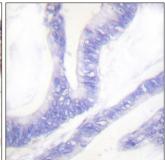

### **Products Images**

Immunohistochemical analysis of paraffin-embedded Human lung cancer. Antibody was diluted at 1:100(4° overnight). High-pressure and temperature Tris-EDTA,pH8.0 was used for antigen retrieval. Negetive contrl (right) obtaned from antibody was pre-absorbed by immunogen peptide.

Immunohistochemistry analysis of paraffin-embedded human lung carcinoma, using Caspase 2 (Phospho-Ser157) Antibody. The picture on the right is blocked with the phospho peptide.
